Cleanrooms

Unlocking Clean Excellence Through GMP Contamination Control Programs

Our technicians perform contamination and particle control to maintain production environments according to cGMP protocols minimizing risk of product contamination and eliminating cross contamination by performing routine cleaning and disinfection protocols, implementing GDP to ensure regulatory compliance.

Our services provide cleaning protocols that are safe for employees, animals, equipment, and the environment, including cage washing and husbandry.

GDI Life Science Markets

- Pharmaceuticals
- Biotechnology and Medical Devices
- Manufacturing Cleanrooms
- Vivarium and Life Sciences
- Semiconductor Manufacturing

GDI Life Science Services

- Biotechnology and manufacturing services
- Controlled Environments
- Packaging areas
- Research and development, tissue culture and pilot laboratories
- Glass Wash
- Virology areas
- Quality control areas
- Pass-through cabinets and airlocks (including doilies, carts, related equipment)
- Gowning areas
- Warehouse and storage areas
- Cold rooms
- Warm rooms
- Mold remediation
- Database, Platforms and learning management systems
- Construction sites
- Consulting Services

Applicable GMP Activities at GDI:

- GMP Cleaning and Disinfection
- VHP Sterilization
- GMP Pest Control
- GMP Logistics Services
- Fire Extinguisher Inspections
- Safety Shower/Eyewash Station Flushing Inspections

GDI Commercial Services:

- Janitorial Cleaning and Disinfection
- Exterior Cleaning
- Moving Services
- Emergency Services
- Specialty Services
